

Innovative and Interactive Hysteroscopy Session in collaboration with Global Community of Hysteroscopy (GCH)

ESGE 30th Annual Congress, Rome Italy, 3-5 Oct 2021

Prof. Luis Alonso
Co-chair GCH, Spain

Prof. Sergio Haimovich
Co-chair GCH, Israel

Prof. Justin Clark
United Kingdom

Prof. Jose Carugno
United States

Tuesday, 5th October, 17:00 - 18:30, Room 3

The ESGE Annual Congress organising committee is thrilled to present this year's joint hysteroscopy session which will be performed in collaboration with the **Global Community of Hysteroscopy (GCH)**.

This exciting session will take place on **October 5th from 17:00 to 18:30** in **Room 3** immediately before our prestigious closing ceremony in which we will present the award winners of this year's event.

This session will start with an amazing talk delivered by **Professor Luis Alonso (Co-chair of the GCH)** from Spain; **"The uterus is as important as the embryo in ART"** in which he will describe key aspects of the role of the uterus in ART that should never be ignored. We guarantee that this talk will leave you with a different perspective of the dynamics of reproduction.

Following this, **Professor Sergio Haimovich (Co-chair of the GCH)** from Israel will dive into myometrial pathology with his talk entitled **"Myometrial pathology: still a challenge for the hysteroscopist?"** in which he will simplify the technical aspects of the hysteroscopic management of patients with myometrial disease. You will leave this talk with many tips and tricks to take home.

Then **Professor Justin Clark** from the United Kingdom will deliver a groundbreaking talk on the diagnosis and management of **Retained Products of Conception** entitled **"Novel approaches for the treatment of RPOC"**, in which you will learn the latest scientific evidence on the management of this challenging pathology.

Finally, **Professor Jose "Tony" Carugno** from USA will bring "hot from the press" the **International Consensus Statement** for recommended terminology describing hysteroscopic procedures that was recently concluded by the Hysteroscopy Nomenclature Taskforce with the talk **"The end of the "Babel Tower" in the hysteroscopy terminology"** in which you will have the opportunity to ask all your questions that you need to clarify before adopting this new terminology into your daily clinical practice.

Make sure not to miss this
exciting, innovative and interactive session.
